- 12.10 **NATO Codification System Initiatives**
Gilles Vergnerie, Codification Branch, NAMSA, Capellen, Luxembourg
- 12.40 Discussion, Concluding Remarks

Status April 2005

Right of Alteration Reserved

Registration Information

After several successful CALS conferences in Germany and international logistics conventions in Vienna, Prague, The Hague as well as a LCM Conference in Brussels in 2001, CPM now returns to the Belgian capital.

This year, the international LCM Symposium is organised in cooperation with the NATO Life Cycle Management Group (LCMG) and the German CALS Forum (CFD). It is scheduled to take place in Brussels on 29 and 30 June 2005 at the PriceWaterhouseCoopers Client Business Centre. Scope of the Conference.

The purpose of Systems Life Cycle Management (SLCM) is to mitigate risk, reduce acquisition times and to identify, quantify and control the life cycle costs of systems and capabilities, from the earliest possible starting point. SLCM will assure that the processes used across projects are consistent, harmonised, and that there is effective sharing and coordination of resources, information and technologies. Amongst others, the principles of SLCM are cooperation and operability, efficiency, collaboration with industry, and quality.

This new approach also provides a new opportunity for the consideration of the Integrated Logistic Support (ILS) concept, particularly for complex international projects.

The conference will provide a forum for the exchange of views and ideas, of experience and concepts, of new and proven approaches to life cycle management and logistics integration among and between programme managers, experts and logisticians both from industry and military organisations, thus covering the main aspects of LCM such as ILS as the basis for optimised and cost-effective logistic processes.

Organised by

CPM Communication Presse Marketing GmbH
Kölnstrasse 93, D-53757 Sankt Augustin, Germany
Phone: +49 2241-92090-0, Fax: +49 2241-21083.
e-mail: lcm@cpm-st-augustin.de
